EAN / ACL :	0604375004009 / 6358256
DLU :	32 month
Autonomy :	10 days approximately

Use biocides with caution. Prior to use, read the label and the information on the product.

PRODUCT DESCRIPTION & ADVANTAGES

- 2 in 1 anti-mosquito repellent that can be sprayed on both skin and clothing.
- Enhanced effectiveness compared to a simple skin repellent (according to WHO, 40% of bites occur through clothing).
- Lighten your travel load (no need to carry a skin repellent + a fabric repellent)
- Ideal for malaria-prone countries : Biovectrol Integral is also effective against mosquitoes in tropical areas (tiger, aedes, anopheles).
- Protection for 8 hours for clothing and 3 hours for the skin.
- This repellent is suitable for the whole family, including babies from 12 months old
- Odorless, non-greasy
- A.M.M. : Marketing authorization number : FR 2018-0046

DIRECTION FOR USE - Skin use

Biovectrol Integral is a skin repellent, in spray form, effective against *Aedes* spp. and *Anopheles* spp. mosquitoes (adult stage) in tropical conditions, for up to 3 hours. The recommended dosage is 0.8 mg of product per cm² of skin. Reapply in case of contact with water without exceeding the maximum recommended number of applications. If applying sunscreen, wait at least 20 minutes after applying sunscreen before applying the product. 100 mL bottle (300L per spray) : For adults and children >12 years: 3 sprays for the head, 2 sprays per arm, 1 spray per hand, and 4 sprays per leg, 1 to 2 times per day. For children aged 6 to <12 years: 2 sprays for the head, 1 spray per arm, and 2 sprays per leg, once per day. For children aged 2 to <6 years: 2 sprays for the head, 1 spray per arm and per leg, once per day. For children aged 1 to <2 years: 1 spray for the head, 1 spray per arm and per leg, once per day. Do not apply to the hands of children under 12 years old. Wash hands before handling food; When the biocidal product is applied to children under 12 years old, it must be applied by an adult. Apply only on the head, arms, hands, and legs. Do not spray directly on the face but spray on hands and then apply to the face. Do not apply around the eyes. Apply up to twice daily for adults and children over 12 years old. Apply once daily for children under 12 years old. Do not apply to the skin in combination with clothing treated for children under 6 years old. If the product is used in combination with clothing treatment, do not apply the product to the skin more than once per day for adults and children 6 years and older. Do not apply the product to the skin underclothing. Non-professional use.

DIRECTIONS FOR USE - Clothing use

Biovectrol Integral is a clothing repellent in spray form, effective against *Aedes spp.* and *Anopheles spp.* mosquitoes (adult stage) in tropical conditions, for up to 8 hours. The recommended dosage is 0.6 mg of product per cm² of skin. Clothing can be stored in a closed packaging such as a plastic bag before use for up to 30 days after application of the product. Renew the application after each wash or use of treated clothing. If stored before use, treated clothing should be placed in a closed packaging such as a plastic bag until their use. 100 mL bottle (300 L per spray): Apply the following number of sprays on the front of the clothes: For adults and children over 12 years old: 6 sprays per shirt, 3 sprays per leg, 1 spray per sleeve. Repeat the process on the back of the clothes; For children aged 2 to 12 years: 2 to 3 sprays per shirt, 1 to 2 sprays per leg, 1 spray per sleeve. Repeat the process on the back of the clothes; For children under 2 years old: 2 sprays per shirt, 1 spray per leg, 1 spray per sleeve. Repeat the process on the back of the clothes; Do not apply to the skin in combination with clothing treated for children under 6 years old. Non-professional use.

PRECAUTION FOR USE

Read carefully and adhere to all restrictions. Respect the application doses of the product. The duration of protection is provided as an indication. Environmental factors (temperature, wind, etc.) can alter the duration of protection. Spray the product evenly from a distance of 10 to 20 cm towards the surface to be treated. Do not use with other repellent products. Inform the holder of the marketing authorization in case of treatment inefficacy. Use in a ventilated area. Avoid breathing vapors. Do not apply on cuts, wounds, or irritated skin. In case of contact with eyes: rinse eyes thoroughly with lukewarm water while keeping the eyelids open, then continue rinsing under a thin stream of lukewarm water for 10 minutes. If wearing contact lenses: rinse immediately with lukewarm water, then remove the lenses if there are no contraindications, and continue rinsing under a thin stream of lukewarm water for 10 minutes. If signs of irritation persist or vision problems occur, consult a doctor. In case of contact with the mouth: rinse thoroughly with water and contact the poison control center or call 15/112. In case of skin reaction, redness, or persistent pain after application of the product, contact the poison control center or consult a doctor. In case of inhalation of high concentrations: rest in a semi-seated position; if symptoms appear, contact the poison control center or call 15/112. In case of consciousness disorders, place the subject in the recovery position (lying on the side); call 15/112. Do not administer fluids or induce vomiting. If consulting a doctor, keep the container or label available. Do not dispose of the biocidal product in drains (sinks, toilets...), gutters, waterways, fields, or any other outdoor environment. Dispose of unused product, its packaging, and any other waste in an appropriate collection system. Keep out of reach of children. Keep away from heat/sparks/open flames/hot surfaces. Keep the container tightly closed. Take precautions against electrostatic discharge. Do not store at temperatures above 40°C. Shelf life: 30 months.
